01

PROJECT

Sigona Villa

Sigona, Limuru

SCOPE OF SERVICES

- Architectural drawings
- Structural drawings
- Project management

KEY FACTS

- 5 bedrooms plus a family room
- Rooftop terrace
- Walled compound with paved parking and landscaping
- Foundation stage documented on site, 23 Sep 2026

ATRO CONSTRUCTION

Architectural render | Front view

ABOUT THE PROJECT

A contemporary five-bedroom villa with an additional family room, designed and managed by ATro from drawings through to site. White rendered volumes meet dark-framed glazing, stone-clad accents and glass balustrades, and the house is crowned by a rooftop terrace. The villa sits within a walled compound with paved parking and landscaped grounds, creating a private and secure family home.

02

PROJECT

Ruiru Mugutha Town House

Ruiru Mugutha

SCOPE OF SERVICES

- Architectural drawings
- Structural drawings

KEY FACTS

- Two-storey modern town house
- Stone-clad feature wall
- Large glazed living areas
- First-floor balcony

ATRO CONSTRUCTION

Architectural render | Front view

ABOUT THE PROJECT

A modern two-storey town house in Ruiru Mugutha, designed by ATro with full architectural and structural drawings. A stone-clad feature wall anchors the facade against dark and white rendered volumes. Large glazed living areas fill the interiors with light, and a first-floor balcony with a glass balustrade adds private outdoor space. A paved forecourt and landscaped frontage complete the compact family plot.

03

PROJECT

Seven-Storey Apartment Block

Kabete | Plot 4715

SCOPE OF SERVICES

- Architectural drawings
- Architectural renders

KEY FACTS

- Client: John and Jedidiah Kariuki
- 7 storeys over a ground-floor parking podium
- 27 units: 26 two-bedroom apartments and 1 studio
- 28 ensuite bedrooms
- Central lift and glazed stair core
- Two roof terraces on the 7th floor

ATRO CONSTRUCTION

Architectural render | Front elevation

ABOUT THE PROJECT

A seven-storey residential block of 27 units, made up of 26 two-bedroom apartments and one studio, set over a ground-floor parking podium. Floors one to six each carry four two-bedroom units with ensuite master bedrooms, while the seventh floor adds two all-ensuite two-bedroom units with laundry areas, a studio and two roof terraces. A central lift and glazed stair core organises the plan.

Architectural render | Interior: open-plan kitchen and dining, typical floor

Architectural render | Interior: lounge and dining, typical floor

TYPICAL UNIT FINISHES, FLOORS 1 TO 6

Kitchen

Taupe flat-panel cabinets with brushed steel handles, light stone-effect worktops, L-shaped layout with breakfast counter and gas hob with chimney hood.

Floors

Polished beige porcelain tiles throughout the living areas.

Walls and ceilings

Neutral warm-toned paint with one ochre feature wall; recessed downlights.

Glazing

Full-height aluminium sliding glass doors from the lounge to the balcony, and large dark-framed windows.

Floor plans

Floor plan | Typical floor plan, floors 1 to 6

Four two-bedroom units arranged around a central lobby, lift and staircase. Each unit has a master bedroom with ensuite, Bedroom 01, a common washroom and utility area, an open-plan kitchen with breakfast counter, dining and lounge areas, and a private balcony.

Floor plans

Floor plan | Seventh floor plan

Two all-ensuite two-bedroom units with laundry areas, a modern studio with its own washroom, and two roof terraces with timber decking, served by the same lobby, lift and stairs.

04

PROJECT

PCEA Baraka Church

Ruiru Mugutha

SCOPE OF SERVICES

- Architectural drawings
- Architectural renders

KEY FACTS

- Seating for 785 congregants
- Tall gabled glazing and stone-clad columns
- Landscaped grounds
- Site progress documented 1 Aug to 29 Oct 2026

ATRO CONSTRUCTION

Architectural render | Front view

ABOUT THE PROJECT

A modern church in Ruiru Mugutha with seating for 785 congregants. Tall gabled glazing, stone-clad columns and white rendered walls give the building a bright, contemporary presence, while the large glazed frontage fills the worship space with natural light. Landscaped grounds, paved walkways and parking frame the approach to the entrance.

Site progress, 1 Sep 2026 | Foundations

Site progress, 12 Oct 2026 | Slab reinforcement

Site progress, 29 Oct 2026 | Slab complete, walling started

05

PROJECT

5-Storey Commercial Building

Gikomba

SCOPE OF SERVICES

- Architectural drawings
- Structural drawings
- Architectural renders

KEY FACTS

- 5 storeys
- Continuous glazed frontage with glass-balustrade balconies on every floor
- Central open staircase
- Paved forecourt with parking, in a walled and landscaped plot

ATRO CONSTRUCTION

Architectural render | Corner view

ABOUT THE PROJECT

A five-storey commercial building in Gikomba, designed by ATro with full architectural and structural drawings. White rendered floor slabs wrap continuous glazed frontages, each floor opening onto a balcony with a glass balustrade. A dark stone-clad feature wall marks one end of the facade, and an open central staircase breaks up the long elevation. A paved forecourt with parking sits within a walled, landscaped plot.
